Personal Profile

Jongyoo Kim received his B.S. degree and the M.S. degree in Electrical and Electronic Engineering from Yonsei University, Seoul, Korea in 2011 and 2013, respectively. He is currently working toward the Ph. D. from 2013. His research interests include 2D/3D image and video processing based on human visual system, quality assessment of 2D/3D image and video, 3D computer vision and deep learning. He has studied image quality assessment since 2012, and, since 2015, his major research topic has been adopting deep convolutional neural networks (CNNs) for no-reference image quality assessment (NR-IQA).

Research Interest

- Perceptual Image and Video Quality Assessment
- Quality of Experience Assessment of 2D/3D/VR Contents
- Visual Discomfort Assessment of 3D Stereoscopic and VR Contents
- Deep Learning and Convolutional Neural Networks
- Human Action Recognition
- 3D Reconstruction

Education

2011-Present Ph.D. in Electrical and Electronic Engineering - Yonsei University, Seoul, Korea
Supervised by Prof. Sanghoon Lee
GPA: 4.03/4.30

2007-2011 B.S. in Electrical and Electronic Engineering - Yonsei University, Seoul, Korea
GPA: 3.67/4.30

Journal Publications

1. **J. Kim** and S. Lee, "Fully deep blind image quality predictor," *IEEE Journal of Selected Topics in Signal Processing*, vol. 11, no. 1, pp. 206–220, 2017.
2. **J. Kim**, T. Kim, S. Lee, and A. C. Bovik, "Quality assessment of perceptual crosstalk on two-view auto-stereoscopic displays," *IEEE Transactions on Image Processing*, 2017. (Accepted)

Tech Reports & Standardization Documents

1. IEEE Standard for Quality of Experience (QoE) and Visual-Comfort Assessments of Three-Dimensional (3D) Contents Based on Psychophysical Studies, in IEEE Std 3333.1.1-2015, 2015.
2. 3DTV Broadcasting Safety Guideline, Telecommunications Technology Association, TTAK.KO-07.0086/R4, 2015

Honors & Awards

- Secretary of the IEEE Human Factors for Visual Experiences WG (P3333.1), 2015 – Present
- Bronze Best Paper Award in IEEE Seoul Section Student Paper Contest, 2016
- Global Ph.D Fellowship, National Research Foundation of Korea, 2011 – 2016
- IEEE IVMSWP Workshop 2013 Volunteer Award, IEEE Signal Processing Society, 2013

Project Experience

- Apr 2017 - Present** Research on Controlling Human Factors for Generation and Utilization of Safe VR/AR Contents
Institute for Information & Communications Technology Promotion (IITP)
I developed an algorithm of quality of experience assessment of VR and AR contents based on psychophysical and clinical analysis.
- Jan 2017 - Present** Development of GPU Hardware for Real-time and Realistic Virtual Reality
Institute for Information & Communications Technology Promotion (IITP)
I developed a perceptual quality assessment algorithm of GPU-rendered images for VR application.
- Jul 2016 - Present** A VR Emotion Study Based on Visual Perception and Artificial Intelligence
National Research Foundation of Korea (NRF)
I developed a convolutional neural network based no-reference image and stereoscopic 3D image quality assessment algorithm.
- Jun 2015 - Present** Research on Video Coding Scheme by Predicting Quality Processing
Samsung Electronics
I developed a video quality assessment algorithm to enhance the video coding scheme.
- Apr 2014 - Feb 2017** Research on Human Safety and Contents Quality Assessment for Realistic Broadcasting
Institute for Information & Communications Technology Promotion (IITP)
I developed a visual discomfort prediction method of 3D stereoscopic images and videos.
- May 2013 - Feb 2017** Development of ODM-interactive Software Technology supporting Live-Virtual Soldier Exercises
Institute for Information & Communications Technology Promotion (IITP)
I developed a real-time human pose estimation system where six Microsoft Kinects and omnidirectional treadmill are used.
- Mar 2015 - Feb 2016** Identification and Copy Protection Technology of Book-scanned Text/Comic Books
Korea Copyright Commission
I developed an efficient algorithm for searching and matching an input comic book from a database.
- Mar 2015 - Feb 2016** Research on Feature Extraction and DB Construction for Image-based Indoor Localization
Electronics and Telecommunications Research Institute (ETRI)
I developed a SLAM algorithm using stereoscopic video streams.
- Feb 2012 - Apr 2014** Implementation of Automatic Measure For 3D Quality Enhancement
Samsung Electronics
I developed a quality measuring model considering display geometry to find optimal enhancement degree.

Software Engineering Skills

- **Programming Languages**
C, C++, Java, Mathematica, Matlab, Python, LaTeX
- **Framework**
Theano, TensorFlow, Android SDK/NDK, NumPy, OpenCV
